

Press Release  
Paris, 2 February 2023

## The inherent group obtains the EcoVadis silver medal for its CSR commitments

**At the end of 2022, the inherent group obtained the EcoVadis silver medal for its CSR commitments. This means that inherent is ranked among the top 25% of companies assessed by EcoVadis. Created in France in 2007, EcoVadis has become the world reference in Corporate and Social Responsibility (CSR) assessments. The label enables the company to know its performance in terms of CSR and to improve transparency vis-à-vis its stakeholders (clients, suppliers, partners...).**

EcoVadis analysed the actions of the inherent group along 4 major lines: social & Human Rights, the environment, ethics and governance and the responsible procurement policy.

As a cloud and connectivity operator, inherent wants to place its activity at the service of ecological transition and guide its clients towards more sustainable digital solutions. The EcoVadis silver medal rewards the inherent CSR policy that is based on 4 major pillars:

### - Cultivate employee energy

By feeding their commitment, by involving them in building a shared culture, by caring about their personal and professional fulfilment and by offering them a quality working environment (Adista and unyc both received the Great Place To Work® label).

### - Offer a solid and sustainable digital structure

Through resources and offers that are scaled to the business and environmental questions of today and tomorrow, natively sovereign, resilient and secure, in a relationship of trust that places ethics and transparency at the centre of our concerns.

### - Create regional links

With a network of nearly 40 agencies all over France, the inherent group contributes to regional attractiveness, accessibility and digital inclusion. inherent is committed to acts of patronage by sponsoring the SolarStratos project, the first stratospheric solar plan, and the adventures of explorer Florent Defay as he sails to meet with indigenous peoples living by the ocean.

### - Make the digital impact more positive for the planet

By sensitising teams and stakeholders, by working on the life cycle of hardware that accounts for nearly 80% of the carbon footprint of the digital sector and with an action plan to reduce the carbon footprint of the group.

The EcoVadis label is valid for one year and offers indications about the lines to develop over the course of the year to take things further in matters of sustainability.

#### EcoVadis, a global reference in corporate CSR assessments

EcoVadis is an assessment and certification organisation for corporate and social responsibility that has become a global reference. EcoVadis has a mission to guide all companies towards a sustainable world and aspires to a world in which technology allows each company to take CSR issues into account in every one of its decisions in order to build a viable economy, improve the well-being of populations and protect the planet on which we all depend. EcoVadis provides sustainability assessments that are reliable and recognised worldwide, enabling all companies to reduce risks, to become better and to accelerate their positive impact on the planet and on society.

#### About inherent

With its three operating brands, Adista, unyc and Cyberprotect, the inherent group symbolises the convergence of companies united by the nature of their business, their values and their strategic ambition. inherent connects companies with their ecosystem, simplifies the management of their Information Systems and guides them in their cybersecurity strategy towards resilience. inherent has set itself the mission to become the reference service platform on the market, capable of delivering an agile service, available rapidly, anytime and anywhere. The no. 1 alternative B2B cloud and connectivity operator, inherent is 1,000 members of staff in France and 230 million euro in sales in 2022.
